

Benedetta Cavallini – Master's student

Benedetta Cavallini is a Master's student in Biomedical Engineering at University of Pisa. She is working on her thesis at the "Regenerative Technologies Lab" of the BioRobotics Institute of Scuola Superiore Sant'Anna. With her master's thesis, she is working on the study and characterization of piezoelectric nanoparticles for stem cells stimulation.

She has a bachelor's degree in Biomedical Engineering from the University of Pisa with a thesis on innovative developments in neonatal incubation.
